Ceramic grain abrasive with self-sharpening effect on a soft cotton backing. It impresses when adopting a surface-driven approach and machining extremely hard surfaces at high pressure due to its aggressive cut and an extremely long service life. The additional grinding-active TOP SIZE layer reduces the temperature in the contact area.

*) designed for use with VSM back-up pad ZKLF for low and medium speed angle grinders.

Benefits

> Self-sharpening effect results in an extremely high stock removal rate thanks to constant recreation of sharp grain points
> The additional grinding active layer VSM TOP SIZE ensures a cool cut and an extended service life
> High wear resistance
> Special coat for hand-held machines

Wear pattern of the grain

The microcrystalline structure of the VSM CERAMICS series enables a much more subtle breaking down of the grain and constantly produces new sharp edges.
